

**Getting to
higher ground
isn't always
so easy.**

For older Pennsylvanians and people with disabilities or special medical needs, being prepared for emergencies is especially important. Because a few inches of snow can become feet, heavy rainfall can turn to flooding and power outages happen all the time. Be ready with food, medicine and an evacuation plan to help make sure that you're safe – no matter what Mother Nature delivers.

Plan ahead. Be prepared.
